Washington, D.C. 20544

Ref: Proposed New Service/Radio Owners
Docket.

Greetings:

My proposal is simple, set aside the frequency space from 2000 Khz to 2590 Khz, 10 Khz wide with a maximum power output of 5 watts. Each unit(similar to a C.B. radio) will be capable of transmitting on any of the new frequencies so that the operator can find a reasonably clear channel to transmit. Each manufacture of these units will supply at their cost, a simplified synopsis of the rules. And since these frequencies can now be received on a shortwave radio, this service would give the novice, church, civic, social or other organizations and pirates an opportunity to own a broadcast facility.

Thank you in advance for this opportunity to express my comments.

Sincerely,

Dorian Cox
